LIST OF CONTENTS

NUMBERS 1–3

I. Elishakoff	1	Editorial. Three facets of uncertainty
G. Alefeld and **D. Claudio**	3	The basic properties of interval arithmetic, its software realizations and some applications
P. Bernard	9	Stochastic linearization: what is available and what is not
E. Bljuger	19	Models of R.C. structures for probabilistic serviceability analysis
M. Ciampoli	29	Time dependent reliability of structural systems subject to deterioration
J. L. Favre	37	Errors in geotechnics and their impact on safety
G. Grandori, E. Guagenti and **A. Tagliani**	47	Seismic hazard analysis: How to measure uncertainty?
H. Grundmann, Ch. Hartmann and **H. Waubke**	53	Structures subjected to stationary stochastic loadings. Preliminary assessment by statistical linearization combined with an evolutionary algorithm
R. Heuer and **F. Ziegler**	65	Nonlinear resonance phenomena of panel-type structures
K. Ikeda, K. Murota, K. Maruyama and **H. Yasunami**	71	Uncertainty in the strength of materials and structures
H. Irschik, K. Schlacher and **A. Kugi**	83	Control of earthquake excited nonlinear structures using Liapunov's theory
H. U. Köylüoğlu and **I. Elishakoff**	91	A comparison of stochastic and interval finite elements applied to shear frames with uncertain stiffness properties
M. Lombardi	99	Optimization of uncertain structures using non-probabilistic models
C. Mariani and **P. Venini**	105	On the use of stochastic models of uncertainty in active control and structural optimization
R. Mazar	119	Uncertainty in the modelling of high-frequency propagators in random media
Y. J. Ren and **I. Elishakoff**	125	New results in finite element method for stochastic structures
K. Schlacher, A. Kugi and **H. Irschik**	137	H_∞-control of random structural vibrations with piezoelectric actuators

55 4 CO XL 3375
01/99 01-075-00 GBC

N. Shiraishil and **H. Furuta** 147 Reliability assessment and assurance of infrastructure systems

K. van Breugel 157 How to deal with and judge the numerical results of risk analysis

P. Venini 165 Robust control of uncertain structures

W.-C. Xie 175 Buckling mode localization in rib-stiffened plates with randomly misplaced stiffeners

N. Yoshikawa, I. Elishakoff and **S. Nakagiri** 191 Worst case estimation of homology design by convex analysis

NUMBER 4

M. Saje, G. Turk, A. Kalagasidu and **B. Vratanar** 197 A kinematically exact finite element formulation of elastic–plastic curved beams

M. Kisa, J. Brandon and **M. Topcu** 215 Free vibration analysis of cracked beams by a combination of finite elements and component mode synthesis methods

Y. Dubois-Pèlerin and **P. Pegon** 225 Object-oriented programming in nonlinear finite element analysis

A. S. K. Kwan 243 A new approach to geometric nonlinearity of cable structures

M. H. Omurtag and **F. Kadıoğlu** 253 Free vibration analysis of orthotropic plates resting on Pasternak foundation by mixed finite element formulation

F.-H. Yeh and **H.-S. Tsay** 267 Dynamic behavior of a poroelastic slab subjected to uniformly distributed impulsive loading

T. Ø. Pedersen 279 Remeshing in analysis of large plastic deformations

NUMBER 5

B. Kumar 289 Editorial

D. E. Grierson 291 Information technology in civil and structural engineering design in the twentieth century

L. Rémondini, J. C. Léon and **P. Trompette** 299 Towards an integrated architecture for the structural analysis of mechanical structures

P. Véron, J. C. Léon and **P. Trompette** 309 Design of textile structures: methodology and data architecture

Jae-Jun Kim and **Ju-Hyung Kim** 319 Designing bar-mesh modules of reinforced concrete structures

M. Hauser and **R. J. Scherer**	339	A cognitive architecture to support structural design tasks
J. de Gelder and **M. Steenhuis**	347	A knowledge-based system approach for code-checking of steel structures according to Eurocode 3
A. I. Neilson	357	A dependency network generator for standards processing
I. Flood	367	Modeling dynamic engineering processes when the governing equations are unknown
A. Mahdavi and **R. Ries**	375	Towards computational eco-analysis of building designs
A. Crowley	389	Construction as a manufacturing process: Lessons from the automotive industry
S. Ogunlana, J. Lim and **K. Saeed**	401	Desman: a dynamic model for managing civil engineering design projects

NUMBER 6

C. G. Bailey	421	Development of computer software to simulate the structural behaviour of steel-framed buildings in fire
G. P. Nikishkov, M. Kawka, A. Makinouchi, G. Yagawa and **S. Yoshimura**	439	Porting an industrial sheet metal forming code to a distributed memory parallel computer
A. H. Al-Gadhib, K. Asad-ur-Rahman and **M. H. Baluch**	451	CDM based finite element code for concrete in 3-D
C. K. Lee and **R. E. Hobbs**	463	Closed form stiffness matrix solutions for some commonly used hybrid finite elements
H.-L. Wang, J. W. Eischen and **L. M. Silverberg**	483	On control and optimization of elastic multilink mechanisms
J. L. Humar and **Y. Soucy**	503	Hybrid component mode synthesis based on test derived data
